Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS

	PAGE
Some Conditions Affecting the Growth and Activities of Azotobacter chroococcum . . . . . E. R. Allen	1– 44
An All-Glass Nitrogen Apparatus . . E. R. Allen and B. S. Davisson	45– 48
Arcangeliella, Gymnomyces, and Macowanites in North America . . S. M. Zeller and C. W. Dodge	49– 59
The Use of the Colorimeter in the Indicator Method of H Ion Determination with Biological Fluids . . . B. M. Duggar and C. W. Dodge	61– 70
Tyrosin in the Fungi: Chemistry and Methods of Studying the Tyrosinase Reaction . . . . . C. W. Dodge	71– 92
Studies in the Physiology of the Fungi. VI. The Relation of Bacteria to Cellulose Fermentation Induced by Fungi, with Special Reference to the Decay of Wood . Henry Schmitz	93–136
Studies in the Physiology of the Fungi. VII. Growth of Wood-Destroying Fungi on Liquid Media S. M. Zeller, Henry Schmitz and B. M. Duggar	137–142
Merulius in North America, Supplementary Notes . . . . . E. A. Burt	143–145
Seed Disinfection for Pure Culture Work . . . . . H. C. Young	147–158
Seed Disinfection for Pure Culture Work: The Use of Hypochlorites B. M. Duggar and Anne W. Davis	159–170

PAGE

An Edible Garden Hebeloma . . . . . E. A. Burt 171–174

Protomerulius Farlowii Burt, n. sp . . . . . E. A. Burt 175–177

The Micro-Colorimeter in the Indicator Method of Hydrogen Ion Determination . . . . . B. M. Duggar 179–181

Studies in the Physiology of the Fungi. VIII. Mixed Cultures . . S. M. Zeller and Henry Schmitz 183–192

Studies in the Physiology of the Fungi. IX. Enzyme Action in Armillaria mellea Vahl, Daedalea confragosa (Bolt.) Fr., and Polyporus lucidus (Leys.) Fr. . . . . Henry Schmitz and S. M. Zeller 193–200

Studies in the Physiology of the Fungi. X. Germination of the Spores of Certain Fungi in Relation to Hydrogen Ion Concentration . . . . . R. W. Webb 201–222

Diastase Activity in Relation to Stage of Development and Carbohydrate Content of the Tuber of Solanum tuberosum . . . . . R. A. McGinty 223–251

The Thelephoraceae of North America. XI . . . . . E. A. Burt 253–280

A Subterranean Algal Flora . . . . . G. T. Moore and Joanne L. Karrer 281–307

Culture Experiments with Melampsora in Japan . . . . . Takashi Matsumoto 309–316

General Index to Volume VI 317–320
